

Mechanical Engineering Products at Börsig

Authorised distributor.

- Proven quality
- Short delivery times
- Partner of premium manufacturers
- Professional consulting
- No minimum order value
- No minimum quantity surcharge
- Customized stockholding

Our portfolio - proven quality.

Products for Mechanical Engineering

Mechanical engineering is a constantly adapting market in which the focus is on cost-effectiveness, quality, flexibility and the range of services offered by the machines. The constantly changing specifications lead to the fact that the manufacturers also continuously optimize their product and service portfolio.

Börsig GmbH is your competent partner in this area and acts for different manufacturers, such as Binder, Harting, Phoenix Contact, TE Connectivity, among others. Due to the complementary portfolios we can offer you almost all components you need for your requirements. We are happy to support you.

Connectors

Connectors are available in many different designs; with us you will always find the right solution for the transmission of energy and data, from the classic circular connector to the heavy industrial connector.

Our manufacturers in the portfolio:

- binder
- CONEC
- HARTING
- HUMMEL
- PHOENIX CONTACT
- TE Connectivity

Communication

Data transmission through network protocols from the control level to the field is used for industrial communication and takes place via the corresponding hardware.

Our manufacturers in the portfolio:

- HARTING
- PHOENIX CONTACT

Switches & Lights

With us you will find a variety of switches and lights to illuminate and operate your machine optimally or efficiently.

Our manufacturers in the portfolio:

- binder
- Bulgin
- C&K
- EAO
- Oshino
- PHOENIX CONTACT
- PTR Hartmann
- TE Connectivity

Housings

In the field of mechanical and plant engineering, housings are used, for example, to protect control elements from external influences in accordance with IP and IK standards.

Our manufacturers in the portfolio:

- BOPLA
- PHOENIX CONTACT

Cables, bushings & glands

Cable glands and bushings are used for protection and tidiness in the control cabinet or around it. They also make it much easier to connect cables.

Our manufacturers in the portfolio:

- CONEC
- HARTING
- HUBER + SUHNER
- HUMMEL
- PHOENIX CONTACT
- TRELLEBORG
- TE Connectivity

Tools

Tools are used, among other things, for crimping, stripping and cutting contacts or cables to ensure efficient processing of switches and connectors.

Our manufacturers in the portfolio:

- HARTING
- PHOENIX CONTACT
- TE Connectivity
